**LKD Aerospace Signs Exclusive Stocking Distribution Agreement With Expendable Manufacturer**

***Hundreds of Additional Expendable Products Broaden Product Line Offering Via E-Commerce Website***

**September 9, 2000** -- LKD Aerospace announced today the signing of a new exclusive stocking distribution agreement with expendable product manufacturer Eagle Air Engineering. These factory-new parts for the aftermarket will be distributed globally by LKD and featured in LKD Aerospace's *state-of-the-art* B2B e-commerce storefront at [www.Lkdaerospace.com](http://www.Lkdaerospace.com). The new product offering includes expendable items that are used on narrow and heavy body commercial jet aircraft.

A leader in aircraft expendables for the aftermarket, Eagle Air Engineering currently manufactures more than 500 individual products that are represented by the stocking distribution agreement. Products encompassed by this Agreement include seals, gaskets, window shades and other expendable items. They are used on a wide range of aircraft platforms including the entire fleet of Boeing and Boeing-MD aircraft from the DC-9 through the B-777.

Lynn Faul, President of Eagle Air Engineering, stated, "We are excited to sign this stocking distribution agreement with LKD Aerospace. With LKD's existing global distribution channels and industry leading e-commerce storefront for the aircraft aftermarket, we believe we will be able to dramatically increase sales and concentrate on what we do best...manufacture high quality products for the aftermarket."

LKD Aerospace also announced the signing of another expendable stocking distributorship agreement with Kaddas Enterprises. Kaddas is a leading manufacturer of airplane demister equipment including filter canister assemblies and components used on the Boeing 747-400, B767 and B777 aircraft. LKD will be the preferred stocking distributor for Kaddas' aerospace products.

Bob Hartman, General Manager, commented, "LKD Aerospace has been a growing customer of Kaddas and we are pleased to expand our business relationship. Our product sales and customer base are expected to greatly increase with their targeted marketing, large levels of inventory and e-business capabilities."

Mark Chamberlain, President and CEO of LKD, commented, "These new stocking distributorship agreements will greatly add to the product offerings at LKD. We are proud to be the stocking distributor for these two great manufacturing companies and look forward to offering these products

to our growing list of customers around the world. This also represents another step forward in LKD's aggressive growth strategy. Combined with our e-business initiatives, recent acquisition of BMR Aviation and opening of our India sales and software development office, LKD is enhancing its position as an aftermarket leader for customers throughout the world. Our goal is to offer the best value proposition in the aerospace aftermarket.”

Earlier this summer, LKD also signed an exclusive distribution agreement with Ametek Aerospace for surplus and rotatable products as well as stocking distribution agreements with Dance Air and KrisMark Group. In May of this year, LKD launched its new e-commerce website which features more than 2,000,000 parts than can be securely searched, priced and bought entirely online with inventory available in real-time. The site is free and requires users only to register. LKD plans to continue leveraging its unique global distribution capabilities coupled with continued heavy investment in Information Technology and e-commerce. Additional growth initiatives include new distribution agreements, strategic partnering and acquisitions as well as the opening of its second International sales office later this summer.

*LKD Aerospace distributes factory new expendables, rotatables and surplus inventory to more than 1700 existing customers around the world serving six continents. LKD also offers exchange, consignment and information services. Customers include major and regional airlines, repair & overhaul facilities, OEM's and aftermarket service companies. LKD's products are used on Boeing, McDonnell Douglas, Airbus, Embraer and Bombardier jet aircraft as well as Fairchild, Beech and Bombardier turboprop aircraft. LKD has been in business since 1983.*
